Interpretation:

Combined Paternity Index: 24,876,624

Probability of Paternity: 99.99995%

The alleged father is not excluded as the biological father of the tested child. Based on testing results obtained from analyses of the DNA loci listed, the probability of paternity is 99.999995%. This probability of paternity is calculated by comparing to an untested, unrelated, random individual of the Caucasian population (assumes prior probability equals 0.50).

The foregoing instrument was acknowledged before me by the signed Laboratory Director on April 8, 2024

Donna L. Urschel
State of Ohio, County of Butler
My Commission Expires May 8, 2027

I, the undersigned Laboratory Director, verify that the interpretation of the results is correct as reported on 4/8/2024.

Debra L. Davis, Ph.D.
